

Focus Flame Academy Pilot Outcomes Report

Blue Ribbon Results Academy

School

Reporting period: Program start – Prepared date

Prepared: 2026-07-27

Confidentiality: Administrative pilot review — privacy-safe cohort summary

Executive summary

Students are actively participating and demonstrating positive signal live learning signals across reading, SEL, and focus activities. Verified pre/post growth remains pending.

Students enrolled: 2

Matched pre/post students: 0 of 2

Average baseline: Not enough data

Average post: Not enough data

Absolute delta: Not enough data

Percentage delta: Unavailable

Weekly completion: 50% (2/4)

Program Health

Students enrolled: 2

Baseline completed: 2/2

Post completed: 0/2

Weekly completion: 50% (2/4)

Assessments completed: 2

Missions completed: 3

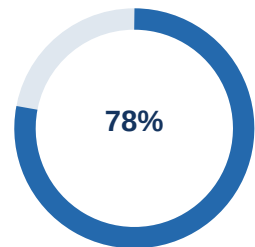

Focus Coins earned: 0

Certificates earned: 0

Last activity: Not recorded

Live Learning Signals

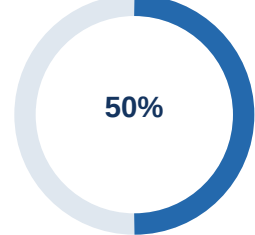

Directional signals from tagged mission activity and accuracy. These are not verified baseline/post growth.

Reading comprehension signal

Positive signal

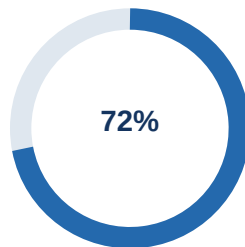

1 students completed 1 tagged missions with 78% average accuracy.

Weekly completion

Positive signal

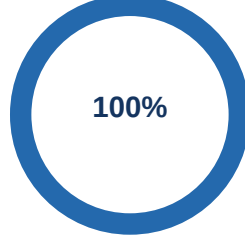

2 of 4 student-weeks completed across published weekly adventures.

SEL signal

Positive signal

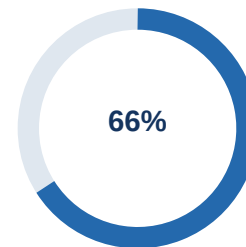

1 students completed 1 tagged missions with 72% average accuracy.

Participation

Positive signal

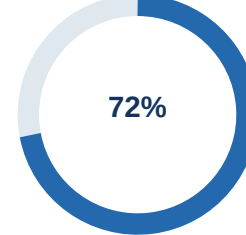

2 of 2 students have at least one assessment.

Focus / executive-function signal

Positive signal

1 students completed 1 tagged missions with 66% average accuracy.

Overall live learning signal

Positive signal

Unweighted composite from 3 domain signal(s) with valid activity data. Missing domains

Evidence labels — Operational: Enrollment, activity, completion, coins, certificates, and participation counts. Directional: Live learning signals derived from tagged mission activity and accuracy. Verified: Matched baseline and post-assessment changes (see Verified Growth).

Verified Growth

Confirmed change based on matched baseline and post-assessments. Center values are percentage-point changes.

Reading comprehension

Awaiting matched

0 matched; 1 required

SEL growth

Awaiting matched

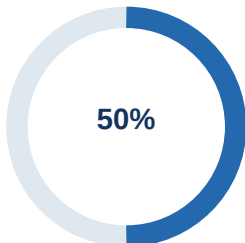

0 matched; 1 required

Focus / executive-function growth

Awaiting matched

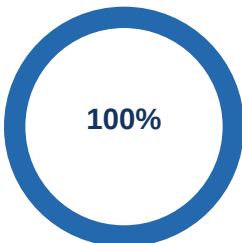

0 matched; 1 required

Weekly completion

Needs attention

2 of 4 student-weeks

Participation

On track

2 of 2 students

Overall matched growth

Awaiting matched

0 of 3 domains; unweighted

Methodology: Unweighted average of domains with valid matched pre/post data. Completion and engagement are excluded from academic/SEL growth. Findings with fewer than 5 matched students are directional.

Detailed outcomes

Measure	Baseline	Post	Delta	Matched	Excluded	Status
Reading comprehension	Not enough data	Not enough data	Not enough data	0	2	Not enough data
SEL growth	Not enough data	Not enough data	Not enough data	0	2	Not enough data
Focus / executive-function growth	Not enough data	Not enough data	Not enough data	0	2	Not enough data

Baseline and post percentages use only students with both mapped domain scores. Excluded records are not imputed.

Program snapshot

Facilitator: Coach

Start date: 2026-01-01

Baseline participation: 2/2

Post participation: 0/2

Assessments completed: 2

Missions completed: 3

Focus Coins: 0

Certificates: 0

Outcomes

Improved: 0

Unchanged: 0

Declined: 0

Incomplete: 2

Key strengths

Not enough matched domain data is available to identify measured strengths.

Areas needing additional data

- No matched baseline and post-assessment records
- Reading comprehension: A mapped post domain score is missing.
- SEL growth: Baseline and post domain scores are missing or not mapped.
- Focus / executive-function growth: Baseline and post domain scores are missing or not mapped.

Engagement

Weekly adventures completed: 2/4

Last activity: Not enough data

Educator observations

What worked: Not provided

Student response: Not provided

Challenges: Not provided

Recommended next steps: Not provided

Approved quote/testimonial: Not provided

Data notes

Pre/post change uses only students with both a valid baseline and post score. Incomplete records remain visible in participation and data-quality totals. Results describe this pilot cohort and do not establish clinical, diagnostic, causal, or statistically significant effects.

Next-step recommendations

- Improve post-assessment completion before final reporting.
- Continue data collection before considering expansion.
- Review weekly participation barriers with the facilitator.
